

# WANTED

ONE WELL USED YELLOW "DOZER"

Pictured here "wiping out the last old growth forests" in Queensland in August 2005.

[Photo and report courtesy ABC Catalyst: Land clearing broadcast 11 August 2005]

The Yellow "Dozer" was recently seen on ABC television News in Tasmania on 21 May 08.

Video of the dozer pushing over scrub and trees was shown to the accompaniment of the News report of

"Environmental activists are calling for the Tasmanian Government to back up the Tasmanian devils' endangered status with new regulations to further protect their habitats from logging."

If you have seen this dozer out in Tasmania "logging" or clearing habitat report it to your local ABC.

(Or perhaps some one can brief the ABC News crew on what constitutes forest practices or what is required on labeling file footage under section 5.8 of their own editorial policies)
